## How to use the UserWay accessibility toolbar.

Here's how to use 'UserWay' - our accessibility tool - including all its features for specific readability needs.

Use the 'Reset All Accessibility Settings' to put your settings back to normal or click 'Move/hide widget' to hide the toolbar off your screen altogether.

Accessibility Menu

== Text Align	You can use the 'Text Align' feature to move text on the webpage to the left, centre or right of your screen.	↓ Line Height	Use the 'Line Height' button to increase spacings between lines of text on the webpage.	<b>&lt;&gt;</b> Text Spacing	Use the 'Text Spacing' feature to modify text and line spacings, this will improve readability for dyslexic and visually impaired readers.	
TT Bigger Text	Click to cycle through bigger text sizes to make text size larger and easier to read.	<b>Df</b> Dyslexia Friendly	UserWay's Dyslexia friendly font can help readability for those with dyslexia.	Pause Animations	Use this feature to pause any moving or auto updating content including animations, blinking and flash content.	
Contrast +	Click through three colour contrast variations to find one that suits your needs.	Tooltips	Tooltips will allow you to see alternative text and more information about some on screen interactive elements with a single mouse hover.	Hide Images	The hide images feature allows you to remove all images from the webpage, leaving only text visible.	
Highlight Links	This feature will highlight all clickable features on the page, including links and buttons.	<b>₩</b>	Click the Cursor feature to access a larger cursor, a 'reading mask' which highlights certain parts of the webpage and a 'reading guide' which allows you to track specific sections of the webpage.
